Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has added a new use on cranberries to the product label of Callisto 480SC Herbicide, containing technical grade mesotrione. The specific use approved in Canada is detailed on the label of Callisto 480SC Herbicide, *Pest Control Products Act* Registration Number 27833.

A corresponding maximum residue limit (MRL) was proposed in the consultation document published on 19 November 2008, Proposed Maximum Residue Limit PMRL2008-30, *Mesotrione*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRL was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRL is legally in effect as of the publication date of this document and is in addition to the MRLs already established for mesotrione.

#### **Established Maximum Residue Limit for Mesotrione**

<b>Common Name</b>	<b>Residue Definition</b>	<b>MRL (ppm)</b>	<b>Food Commodity</b>
Mesotrione	2-[4-(methylsulfonyl)-2-nitrobenzoyl]-1,3-cyclohexanedione	0.01	Cranberries

A complete list of all MRLs established in Canada can be found on the Maximum Residue Limits for Pesticides webpage in the Pesticides and Pest Management section of Health Canada's website.
